SERVICES

01 Loading

One World takes the time to ensure that every item is carefully packed, listed for inventory, and tagged for moving before loading your furniture and possessions. We use strong plastic Stretch wrap for upholstered furniture to protect it from possible scratches and dirt. We utilize specialized packaging for other commodities to prevent moving. After being prepared, all of your belongings are methodically placed onto our moving trucks and driven to their new address.

02 Transportation

Safety is a top-priority for One World and each of our moving trucks contains suspension systems with air ride protection. Our drivers are all licensed and certified with quality training, and are committed to making sure your belongings are transported in a professional way. Whether it is a local, state to state or long distance move, we have you covered.

03 Unloading

After delivery, we take inventory during the unloading process to ensure that each item is present. With your guidance and instruction, our trained movers will carefully place all of your boxes and furniture into each room, and we will provide re-assembly services as requested.
